01 // ASSESSMENT

Entra Passkey Assessment

FIXED PRICE **EUR 2,500**

See your sign-in methods the way you see your licences. Who has what, and who actually uses it.

THE SITUATION

On 1 February 2027 Microsoft stops delivering Entra ID sign-in codes by SMS and voice call. Most organisations can see what is enabled. Few can say which users depend on what, which methods are really used and who will be stuck on that day.

WHAT YOU GET

+ Enabled, registered and actually used, shown as three separate numbers, not one readiness percentage
+ The users who would be stuck without SMS or voice codes, by name
+ Single-device users, multi-device users, shared PC users and admins separated into groups that need different paths
+ Admin and other sensitive accounts flagged before anything changes
+ The decisions management has to make, with options and consequences
+ A pilot scope and a baseline to measure the migration against

BEST FIT WHEN

You need facts before changing policy, or you have to explain to management how big the migration really is.

HOW IT WORKS

Three steps, no changes to your tenant.

01	02	03
Kick-off	**Assessment**	**Results**
We agree scope, contacts and access.	We review your tenant read-only and hold one working session with your team about devices, ways of working and applications.	Report and walkthrough with your team, including the recommended next steps.

WHAT YOU RECEIVE

+ Assessment report
+ Summary for management
+ User groups and the recommended path for each
+ Open decisions and pilot scope
+ Walkthrough session with your team

WHAT WE NEED FROM YOU

+ Read-only access to your tenant for the assessment period
+ One contact person
+ Time for one working session

NOT INCLUDED

- Any changes to your tenant. The Assessment only reads.

AFTER THE ASSESSMENT

You can stop there with a clear picture, or continue with Entra Passkey Migration & Deployment. Every migration starts with the Assessment.
